Developing Tomorrow's PM Talent: A Workshop for HR Professionals

Facilitated by Anthony Fasano and Fiona Johann

In today's fast-paced AEC industry, one-off bootcamps and generic training can't keep up with the demands of projects, clients, or talent. To scale, firms need a sustainable Project Management Ecosystem™—one that delivers consistent results, drives profitability, and develops top PM talent. HR professionals play a critical role in building this foundation.

In this workshop, Anthony Fasano, P.E., AEC PM and author of *Beyond PM Training*, will share proven strategies to help firms design scalable PM systems that fuel growth. You'll learn how to define career paths, assess strengths and gaps, align development with career stages, and standardize tools and onboarding. THE FUTURE IS HUMAN

THE POWER OF PEOPLE IN THE AGE OF TECHNOLOGY

Welcome to the 2026 AEC HR Summit, where leaders and innovators gather to share best practices, strategies, and insights while strengthening relationships across our community. This year's theme, *The Future is Human: The Power of People in the Age of Technology*, highlights that while AI and emerging technologies are transforming the way we work, the true competitive advantage will always be people. Every firm is navigating rapid change, from new tools to shifting expectations to increasing pressure to deliver results. The organizations that will thrive are those that continue to invest in their most valuable asset: their people. In a world fueled by technology, human creativity, empathy, and collaboration are what set great workplaces apart.

At this year's Summit, we will explore how to balance innovation with humanity by investing in programs, strategies, and cultures that keep people at the center of progress. Join us as we uncover how firms can embrace technology while never losing sight of what matters most: the power of people to shape the future.
